In-hospital Diagnosis (Period #3) (ID#3)	Clinical QA	Medical Case	Accuracy	1748
<b>Description</b>				
<p>The third stage of patient consultation, physicians need to ascertain the appropriate treatment for patients by evaluating their diseases and presenting symptoms, which may involve surgical intervention or pharmacotherapy.</p>				
<b>Design Rationale</b>				
<p>Treatment plans evolve based on patient responses and new findings. Evaluating the LLMs' ability to recommend treatments tests their understanding of disease progression, therapeutic options, and patient management strategies.</p>				
<b>Example</b>				
<b>Prompt</b>	<p>你是一位专业的医学领域专家，利用你的医学能力解决以下问题。接下来我将提供一份患者在入院时的症状，你需要由此判断接下来需要对患者选择哪些治疗方案。..... \n 以下是提供的患者病例：</p> <p>You are a professional medical expert, utilizing your medical expertise to address the following issue.
